MINING & TUNNELLING EQUIPMENT

Made to measure as standard!

The CMM line of mining and tunnelling equipment is mainly used underground.

Versatility

The CMM product offer features a full range of drilling, scaling, bolting, ANFO/ANOL CHARGERS, loader as well as special derivative machines.

The CMM machines can be mounted on wheeled carries or caterpillar-tracks or rail or customer-supplied carriers, thus ensuring optimum competitiveness and performance. They can be diesel, electric or diesel-electric powered...

Simple and Sturdy

CMM machines are purpose-designed for mining.

They are sturdy and easy to use, while their simple design reduces maintenance to a minimum.

Between professionals

CMM uses all its vast experience in machine production and mining engineering to provide a complete service, to help you maximize your productivity.

Our engineering office provides mechanical, hydraulic, electrical and automation expertise for machine design and adaptation; end-user training; spare parts services; after-sales service.

1899

Creation of a maintenance activity for agricultural vehicle, sale of machinery and pumps

1920

Carspach plant building

1960

Sale of « Workshops Construction Carspach SA » to « Potash Mines of Alsace »

1979

Creation of CMM
« Construction Equipment for mines »

2013

CMM joined the industrial group ErgoDeveloppement
